

Question 3.

```
public class Student {  
    String name;  
  
    public Student(String name) {  
  
        this.name=name;  
  
    }  
  
    public String display() {  
        return name;  
    }  
  
    public static void main(String[] args) {  
  
        try {  
            Student s = new Student("Priyanshu");  
  
            System.out.print(s.display());  
  
        }  
        catch(Exception ex) {  
  
            System.out.println("Unknown");  
        }  
    }  
}
```
